ENSURE YOUR VALUABLE GOODS
ARRIVE IN PERFECT CONDITION

NOMAFOAM®

Your foam specialist with a wide selection of standard products as well as well thought out customised solutions. We use our know-how to provide a bespoke, individual and sustainable solution for all your foam applications.

APPLICATIONS

HIGH PERFORMANCE FOAM MATERIALS ARE USED IN ALL SECTORS

NMC foam products provide reliable protection and can be removed completely afterwards. In addition, our solutions can be integrated easily in existing assembly line productions. Therefore: maximum protection and guaranteed product quality from manufacture to delivery to the end customer.

FURNISHING INDUSTRY

Packaging technique and living comfort according to your needs

TRANSPORT

For an all-round safe transport and comfortable driving experience

CIVIL ENGINEERING

Omnipresent in construction and underground engineering

WINDOW INDUSTRY

Energy efficient windows secured at the construction site

OFFSHORE INDUSTRY

Safety for people and sea

SPORT & LEISURE

Fun and safe activities

PERSONAL PROTECTION

Protected in all circumstances

CONSUMER ELECTRONICS

Safe transport of valuable components

MEDICAL ENGINEERING

Comfort and safety in the medical branch

ALL FUNCTIONS

HIGH PERFORMANCE FOAM MATERIALS
WITH MULTI-FACETED PROPERTIES

INSULATING

Insulation for all purpose

PROTECTING

For transport, processing
and storage

SOUND PROOFING

Noise prevention and
noise protection

FLOATING

Usable on all waters

SEALING

Sealing joints

LIGHTWEIGHT

A light permanent structure

UPHOLSTERY

Comfort thanks to good
adaptability

MATERIAL

The most diverse characteristics and attributes allow versatile application in almost every conceivable field. NMC can develop tailor-made formulations or blends in order to reach your needs.

	thermal conductivity	max. service temperature	rigidity	chemical resistance	water absorption	recyclability	thermo-formability

PROCESSING

Our core skill lies in the development, production and international marketing of technical foams. We have mastered the required technological methods in order to process raw materials and combine them in a complex and precise production process.

Our products' varied range of applications can be customized by means of additional processing. Countless techniques and options are available for further improving products during or following the production process. Naturally we work closely with our customers to collectively devise the best possible solution.

EXTRUSION

Extrusion is the ability to create technical ambitious foam profiles; cross-linked or non-cross-linked sheets and rolls for both standard and custom designed specifications. Thanks to many years of experience, we are able to combine and optimise the whole process and production chain. Various densities, colours, tailor made profiles and foils are also available upon request. Coextrusion is a production process of foam in which two or more compatible feed materials are merged together. Foam profiles can be coated with an additional layer of non foamed material in various colours or they can be re-inforced with an additional coating to increase for example their mechanical or UV resistance.

LAMINATING

Lamination is the technique of manufacturing a material in multiple layers, so that the composite material achieves improved strength, sound insulation, appearance or other properties. Whether it will be foam on foam or semi-finished material lamination, high emissivity aluminum foil or hook and loop fastener – there are many possibilities.

THERMOFORMING

Thermoforming is a manufacturing process where a foam product is heated and formed to a specific shape in a mould and finally trimmed to create a finished product. A wide range of extremely complex design criteria can be met and even three dimensional products can be realized.

CONVERSION

ADHESIVE

We are able to apply different types of adhesives to join materials together; either with a hot melt or an adhesive tape. The adhesion can be permanent or removable, adapted to a specific temperature range. We offer a great choice of possibilities.

CUTTING

Extruded profiles or foils and sheets could be up-graded by additional mechanical process like cutting, milling or stamping. According to customer requirement they can be for example, equipped with special cuts to make them more flexible and elastic. Foam profiles can be finished partially cut to simplify handling and avoid waste material.

NOMAPACK®

THE RIGHT
SHAPE
FOR EVERY
SITUATION

NOMAPACK®

PROTECTIVE PACKAGING AND SHOCK ABSORPTION

NOMAPACK® offers a wide range of standard products along with many special shapes, and special customised solutions can also be supplied to customers at short notice. NOMAPACK® is indestructible and offers reliable protection for your product against damp, temperature fluctuations and mechanical factors.

NOMAPACK® packaging solutions fit any shape of product, with no need for fixing aids, and they are as light as a feather, which means they save on both space and transport costs. NOMAPACK® is made from environmentally responsible materials, repels dirt and is washable, making it very hygienic. NOMAPACK® is also recyclable, meaning it makes a valuable contribution in terms of environmental protection and sustainability.

NOMAPACK® U

THE EDGE PROTECTOR FOR EVERY APPLICATION

PROTECTED AND UNIVERSALLY USABLE

The NOMAPACK® U-range consists of effective protection profiles for edges and curves of all types. Thanks to the various dimensions and thicknesses and thanks to the possibility to develop bespoke profiles, you'll always find suitable protection for your product with NOMAPACK® U.

- › Edge protection from 2 to 160 mm
- › Easy fitting Multishape version
- › Patented design

PRODUCT FEATURES:

- › PE-LD foam
- › Supplied as lengths or coils
- › Water absorption < 1 – vol.% after 40 days
- › Recyclable
- › The tolerance of the length of the coils is up to a maximum of 2%

APPLICATIONS:

- › Tables and worktops
- › Shelves, storage units and other furniture parts
- › Mirrors, glass plates, ceramic
- › Works of art, framed pictures, etc.

NOMAPACK® WS

BREAK-PROOF FROM A TO B

THE EDGE PROTECTOR FOR GLASS, SHEET METAL AND NARROW EDGES

NOMAPACK® WS is the innovative transport protector for windscreens and glass products. The additional inner hole reinforcement prevents sharp edges from piercing the profile and thus offers perfect protection for your product. An extensive range of tool accessories facilitate the processing of the NOMAPACK® WS profile.

- › Patented glass edge protection
- › Unique profiles, with inside reinforcement
- › Efficient protection against scratches and breaks

PRODUCT FEATURES:

- › PE-LD foam
- › Supplied as coils
- › Water absorption < 1 – vol.% after 40 days
- › Recyclable
- › The tolerance of the length of the coils is up to a maximum of 2%

APPLICATIONS:

- › Glass edges
- › Windscreens
- › Heavy and sharp goods

NOMAPACK® L

THE RELIABLE PROTECTION FOR CORNERS AND EDGES

NOMAPACK® L provides reliable protection for corners and edges made of glass, wood, plastic or metal.

- › Available in various lengths and thicknesses
- › With or without adhesive

PRODUCT FEATURES:

- › PE-LD foam
- › Supplied as lengths
- › Water absorption < 1 – vol.% after 40 days
- › Recyclable

APPLICATIONS:

- › Corners and edges
- › Narrow and scratch-sensitive goods
- › Can be used in shrinking tunnels

NOMAPACK® SYSTEM

THE FRAME FOR SENSITIVE GOODS

NOMAPACK® System, the efficient transport protection for sensitive goods. Thanks to its directly extruded, specially developed L-shape with integrated holes, it offers ideal protection against impacts and vibration and is easy to process into a packaging frame.

- › Outstanding protection against shocks and vibrations
- › Tailor-made, adaptable and customer-oriented solutions

PRODUCT FEATURES:

- › PE-LD foam
- › Density from 24 kg/m³ to 34 kg/m³
- › Supplied as lengths
- › Water absorption < 1 – vol.% after 40 days
- › Recyclable

APPLICATIONS:

- › High-tech products
- › Medical devices

NOMA® PROTECT TUFF PAD

THE LONG TERM PROTECTION

NOMA® PROTECT Tuff Pad are coextruded round foams with a reinforced outer skin which offers various applications. Ideal to protect our kids while playing and climbing on playgrounds, trampolines or other game areas. NOMA® PROTECT Tuff Pad are always there to prevent injuries and crushes. They cover the complete metallic structure and provide a long term protection.

PRODUCT FEATURES:

- › PE-LD foam / Outer skin PE-LD
- › Supplied as lengths
- › Water absorption < 1 – vol.% after 40 days
- › Recyclable
- › Relatively UV resistant
- › Conform with norm EN 71-3
- › Pre-slit for easy use
- › Other colours available on request
- › Washable

APPLICATIONS:

- › Playgrounds, kids playing areas and climbing frames
- › Scaffolding
- › Horse trailer – bar coating
- › Ski areas/ski lifts
- › Diverse

NOMA[®] PROTECT TEMPORARY PROTECTION

THE SHORT TERM PROTECTION

NOMA[®] PROTECT TEMPORARY Protection 114x13/2 m is a solution specially designed to protect door frames and edges whilst construction, renovation or move-around,... Thanks to its flexibility, this pre-slit profile can be easily fixed.

PRODUCT FEATURES:

- › PE-LD foam
- › Supplied as lengths
- › Water absorption < 1 – vol. % after 40 days
- › Recyclable
- › Easy to fix

APPLICATIONS:

- › Adheres thanks to its natural clamping force and can be reused many times
- › Protects punctually and prevents from moving damages
- › Can be used on any standard door frame
- › Is available in other sizes and colors (on request)

NOMA® PROTECT TEMPORARY PROTECTION 114 x 13 / 2 m

NOMA® PROTECT WARNING PROFILES

NOMA® PROTECT WARNING PROFILES effectively prevent dangers thanks to their striking signal color and provide reliable impact protection through their flexibility. The high-performance adhesive used keeps the profile in place even under difficult conditions.

PRODUCT FEATURES:

- › Flexible PU foam
- › Permanent adhesive, suitable for almost all surfaces
- › Integrated finger lift for easy removal of the protective film
- › Available in lengths of 1 m or on request in 2 m lengths

APPLICATIONS:

- › Edge protector
- › Prevention of impact injuries at shelves and corners
- › Production area
