

## PRODUCT SPECIFICATION

# NOMAPACK® PALLET DIVIDER

NOMAPACK® Pallet Divider is a well established product for safe and protective transporting of components throughout the whole manufacturing and distribution chain.

### PRODUCT FEATURES

- › Core of corrugated cardboard made of 100 % recycled material.
- › Laminated with PE foam on both sides.
- › PE foam is laminated with biobased hot melt adhesive.
- › Available with foam border or cut clear along the cardboard edges.
- › Available in various thicknesses and strengths of the corrugated cardboard.
- › Antistatic PE foam surface available on demand.
- › Effective fixation and protection.
- › Stiff and easy to handle.
- › Liquid resistant, thanks to the protective PE foam.

## PRODUCT SPECIFICATION

# NOMAPACK® PALLET DIVIDER

### CORE MATERIAL

- › Stiffness: depends on the quality of the corrugated cardboard and the type of fluting
- › Compressive strength: depends on the wave-length (distance between the „waves“)
- › Other sizes, foam versions and corrugated cardboard qualities on request (E.g. for half pallets)

### SURFACE MATERIAL:

- › By its tightness and softness, the PE foam protects the product to be packed
