

NOMAPACK® SYSTEM

NOMAPACK® System provides a solution for protecting sensitive goods during transport and storage. The directly extruded, specially developed L-shape with integrated holes supports stable positioning and protection against shock and vibration loads.

PRODUCT FEATURES:

- » Manufactured from polyethylene (PE LD) foam
- » Density range from 24 kg/m³ to 34 kg/m³
- » Water absorption: < 1 – vol.% after 40 days
- » Cushioning curves available on demand
- » Supplied as lengths

APPLICATIONS:

- » High-tech products
- » Medical products

RECYCLING INFORMATION: This product can only be processed in specific polyethylene (PE LD) recycling systems where suitable collection, sorting and recycling infrastructure is available. Such systems are not widely established and their availability varies by region. Whether recycling is possible therefore depends on local waste management capabilities.
