

NOMA® PROTECT
TEMPORARY PROTECTION 114x13/2 m

NOMA® PROTECT TEMPORARY Protection 114 × 13/2 m is a signal-red protective profile designed for the temporary protection of door and window frames as well as stair posts during construction work, renovations, and moves. Thanks to its high clamping force, the profile holds firmly in place on the frame without the need for additional adhesive tape or tools. The profile is pre-slit along its length and can be quickly pushed onto edges. Under typical conditions of use, it can be removed without leaving residue and, if handled properly, it can be reused multiple times.

PRODUCT FEATURES:

- » Manufactured from polyethylene (PE LD) foam
- » Water absorption: < 1 – vol.% after 40 days
- » Supplied as lengths
- » Available in other sizes and colours (on request)

APPLICATIONS:

- » Helps protect door and window frames against impacts and scratches during moves.
- » Suitable for installation on most standard door frames.

RECYCLING INFORMATION : This product can only be processed in specific polyethylene (PE LD) recycling systems where suitable collection, sorting and recycling infrastructure is available. Such systems are not widely established and their availability varies by region. Whether recycling is possible therefore depends on local waste management capabilities.
