

NOMA® PROTECT TUFF PAD

NOMA® PROTECT Tuff Pads are co extruded round profiles with a reinforced outer skin. They are suitable for covering rigid structures, such as metal bars, and their shock-absorbing properties help to reduce mechanical impact.

Tuff Pads are used in various application areas, including industrial installations and event construction, as well as leisure and temporary structures. They are designed to protect components, contact surfaces and defined areas from mechanical stress, thereby contributing to safety.

The outer skin has limited UV resistance. Outdoor use is possible, depending on the exposure duration and environmental conditions.

PRODUCT FEATURES:

- » Foam and outer skin manufactured from polyethylene (PE LD) foam
- » Pre-slit profile
- » Water absorption: < 1 – vol.% after 40 days
- » Complies with EN 71 3 requirements
- » Relatively UV-resistant
- » Washable surface
- » Supplied as lengths
- » Available in additional colours and dimensions on request

APPLICATIONS:

- » Playgrounds, climbing frames and trampolines
- » Sports halls and fitness studios
- » Scaffolding
- » Horse trailers (bar covering)
- » Ski slopes
- » Event construction and temporary installations

RECYCLING INFORMATION : This product can only be processed in specific polyethylene (PE LD) recycling systems where suitable collection, sorting and recycling infrastructure is available. Such systems are not widely established and their availability varies by region. Whether recycling is possible therefore depends on local waste management capabilities.
